

PE-Foam Carriers for Self-Adhesive Applications - Construction Industry -

APPLICATIONS

The world of adhesive solutions is continuously developing. Adhesive tapes are more and more replacing traditional fixing methods within the construction industry. Tape solutions with TROCELLEN polyethylene foam carriers are not only perfectly suitable for most diversified fixations but also give added value by reducing weight, providing thermal and acoustic insulation and easing the application process.

- Optionally available with single or both side Corona treatment or long-term stable AST.
- Burning behaviour class B1 (DIN 4102)

TROCELLEN foams in adhesive tapes are used for fixation of:

- Extruded profiles:
 - ✓ window bars
 - ✓ protection profiles
- Interior fitting / light construction:
 - ✓ dividing walls
 - ✓ trapping strips
- Frontage / windows:
 - ✓ window frames
 - ✓ frameless glazing
- Roof construction:
 - ✓ nail sealing
 - ✓ roof sealing

BENEFITS

- flexible and conformable
 - ✓ excellent sealing and dampening
 - ✓ optimal resilience behaviour
 - ✓ ideal for uneven surfaces
- smooth surface, cross-linked & closed-cell structure
 - ✓ very good compatibility with adhesive systems
 - ✓ easy to coat and convert
 - ✓ no absorption of humidity
 - ✓ thermal & sound insulating
