

Foams for Self-Adhesive Applications - Automotive -

APPLICATIONS

The world of adhesive solutions is continuously developing. Within the automotive industry, there is broad potential for high-quality adhesive foam tapes for most diversified applications. In order to reduce weight, absorb noises, for insulation reasons or just to ease the installation process, adhesive foam tapes are increasingly used for fixation of different automotive applications.

TROCELLEN polyethylene foams developed to fit your processes can be found in end-applications like:

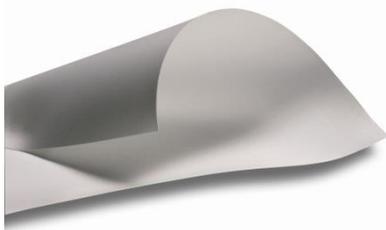

- side mirrors
- emblems
- headliners
- die-cut sealing parts
- decorative strips

Discuss with us your material requirements such as increased softness, reduced stiffness, high elongation at break or special heat resistance.

Optionally available with single or both side Corona treatment or long-term stable AST.

BENEFITS

- smooth surface, cross-linked & closed-cell structure
 - ✓ easy to coat & die-cut
 - ✓ excellent adhesion bonding
 - ✓ low thickness tolerances
- flexible and conformable
 - ✓ very good fitting accuracy
 - ✓ optimal resilience behaviour
 - ✓ excellent sealing function
