

PE Foams for Medical Pre-Products

APPLICATIONS

The medical sector has high demands regarding the adaptability and reliability of the electrodes. Our polyethylene foams with its unique characteristics such as flexibility and closed-cell structure and therefore water-impermeability is perfectly suited for these challenging applications.

Together with our market-, product- and application specialists we continuously develop customized solutions meeting the sophisticated requirements within the medical sector.

You find TROCELLEN polyethylene foams as carrier material for:

- long-term ECG electrodes
- neutral electrodes
- wound-pads

Optionally available with single or both side Corona treatment or long-term stable AST.

BENEFITS

- smooth surface, flexibility, clear white colour
 - ✓ very comfortable for human skin
